

CEMSAN

Instant Water Heaters

Made in Turkiye

Model C900

The C900 provides unlimited instant hot water whenever you need. It is easy to install and simple to use. You can set the heating power to three different level by using knob on the device. With its compact dimensions, C900 can be installed anywhere

Height : 350mm

Width : 250mm

Depth : 110mm

Supply voltage : 220-240V AC

Frequency : 50/60Hz, Single Phase

Three Heat Settings

Minimum Water Pressure : 1bar

Maximum Water Pressure: Open Outlet, 1Mpa(10bar)

IP Rating: Ip25

Energy Efficiency Class : A

SPEED has been engineered to work better, more intuitively and more efficiently. It is equipped with three powerful heating elements, so you can set the heating power to three different levels by using the knob on the device. It provides hot water to the shower, kitchen or anywhere you need. With its compact dimensions, SPEED can be installed anywhere. You almost forget, it's there.

Available as:

SPEED 7.5Kw / 9Kw / 10.5Kw / 12 Kw

White

Height: 370 x Width: 235mm x Depth: 94mm

Easy to use

Multi point usage

Hot water in seconds

Energy Efficient

Space Saving Design

Overheat protection

Supply Voltage: 220-240V AC

Frequency: 50/60Hz, Single Phase

Three Heat Power Settings

Minimum Water Pressure: 1bar

Maximum Water Pressure: Open Outlet, 1Mpa(10bar)

IP Rating: Ip25

Energy Efficiency Class: A

—|SPEED 7.5|—

SPEED has been engineered to work better, more intuitively and more efficiently. It is equipped with three powerful heating elements, so you can set the heating power to three different levels by using the knob on the device. It provides hot water to the shower, kitchen or anywhere you need. With its compact dimensions, SPEED can be installed anywhere. You almost forget, it's there.

Available as:

SPEED 7.5

White

Height: 370 x Width: 235mm x Depth:94mm

Easy to use

Multi point usage

Hot water in seconds

Energy Efficient

Space Saving Design

Overheat protection

Supply Voltage: 220-240V AC

Frequency: 50/60Hz, Single Phase

Three Heat Power Settings

Minimum Water Pressure: 1bar

Maximum Water Pressure: Open Outlet, 1Mpa(10bar)

IP Rating: Ip25

Energy Efficiency Class: A

SPEED 9

Every component in SPEED 9 is optimized for performance. There is an unprecedented amount of power in an unthinkable amount of space. It is equipped with three powerful heating elements, so you can set the heating power to three different levels by using the knob on the device. It provides hot water to the shower, kitchen or anywhere you need. With its compact dimensions, SPEED can be installed anywhere. You almost forget, it's there.

Available as:

SPEED 9

White

Height: 370 x Width: 235mm x Depth:94mm

Easy to use

Multi point usage

Hot water in seconds

Energy Efficient

Space Saving Design

Overheat protection

Supply Voltage: 220-240V AC

Frequency: 50/60Hz, Single Phase

Three Heat Power Settings

Minimum Water Pressure: 1bar

Maximum Water Pressure: Open Outlet, 1Mpa(10bar)

IP Rating: Ip25

Energy Efficiency Class: A

|SPEED 10.5|

SPEED 10.5 is designed to work better, more precisely and more effectively. It has three powerful heating elements. You can choose one of the three different heating powers by using the knob on the device. Provides hot water to your bathroom, kitchen or anywhere you need. SPEED can be installed anywhere, thanks to its small dimensions. You almost forget, it's existence.

Available as:

SPEED 10.5

White

Height: 370 x Width: 235mm x Depth:94mm

Easy to use

Multi point usage

Hot water in seconds

Energy Efficient

Space Saving Design

Overheat protection

Supply Voltage: 220-240V AC

Frequency: 50/60Hz, Single Phase

Three Heat Power Settings

Minimum Water Pressure: 1bar

Maximum Water Pressure: Open Outlet, 1Mpa(10bar)

IP Rating: Ip25

Energy Efficiency Class: A

| S P E E D 1 2 |

Every part of the SPEED 12 instant water heater is designed for high performance. It generates incredibly high power in very small space. It has three powerful heating elements. You can choose one of three different heating powers by using the switch on the device. It provides hot water to your bathroom, kitchen or anywhere you need it. Thanks to its small dimensions, SPEED 12 can be installed anywhere. You almost forget its existence.

Available as:

SPEED 12

White

Height: 350 x Width: 250mm x Depth:120mm

Easy to use

Multi point usage

Hot water in seconds

Energy Efficient

Space Saving Design

Overheat protection

Supply Voltage: 220-240V AC

Frequency: 50/60Hz, Single Phase

Three Heat Power Settings

Minimum Water Pressure: 1bar

Maximum Water Pressure: Open Outlet, 1Mpa(10bar)

IP Rating: Ip25

Energy Efficiency Class: A

INSTANTANEOUS Water Heaters

Cemsan B

Cemsan B has been engineered from the ground up for efficient performance. It is designed to install effortlessly in your house. It provides hot water to the shower, kitchen or anywhere you need. The heating elements in Blue are not only designed with enormous attention to detail, but are also assembled with extreme precision and care. We carefully place the heating elements so that not a single millimeter of space is wasted. You can set the heating power to two different levels by using the knob on the device.

Available as
BLUE 400V 21kW

White

H: 450 mm W: 235 mm D: 94 mm

Multi-point usage

Hot water in seconds

Energy efficient

Fully electronically controlled

Overheat protection

Solar compatible

Three heat settings

21 kW power settings

Supply voltage : 380-440V AC

Frequency :50 / 60Hz, Three Phase

|Cemsan BS|

Making powerful things simple requires some seriously advanced technologies. Every component in the BS is optimized for performance. Each component has been rethought, from the heating element to the knob. The result is more than just a new water heater. It has an impressive capacity to provide hot water you need everyday. You can adjust the water temperature from 20°C to 60°C by using the knob on the device. A built-in sensor detects changes in water temperature and adjusts the heating power automatically.

Available as
BLUE S+ 400V 24 kW
White
H: 450 mm W: 235 mm D: 94 mm
Multi-point usage
Hot water in seconds
Energy efficient
Fully electronically controlled
Overheat protection
Solar compatible
Digital temperature adjustment
24 kW power settings
Multi-function display
Three heat settings
Supply voltage : 380-440V AC
Frequency : 50 / 60Hz, Three Phase
